

STAT-335 Project Phase 1

2026-02-11

Team Members: Ducheng Tan, Alexander Beckford

Project Title: Trading Tuesday or Taco Tuesday?

Topic Selections: Bitcoin (Cryptocurrency), S&P 500 (Stock Market Index), Taco (Dish)

Location: The United States is the right location for our topics since the S&P 500 is based on the top 500 stocks in the U.S., Bitcoin is well known in the U.S., and there are a sufficient amount of tacos being eaten in the U.S..

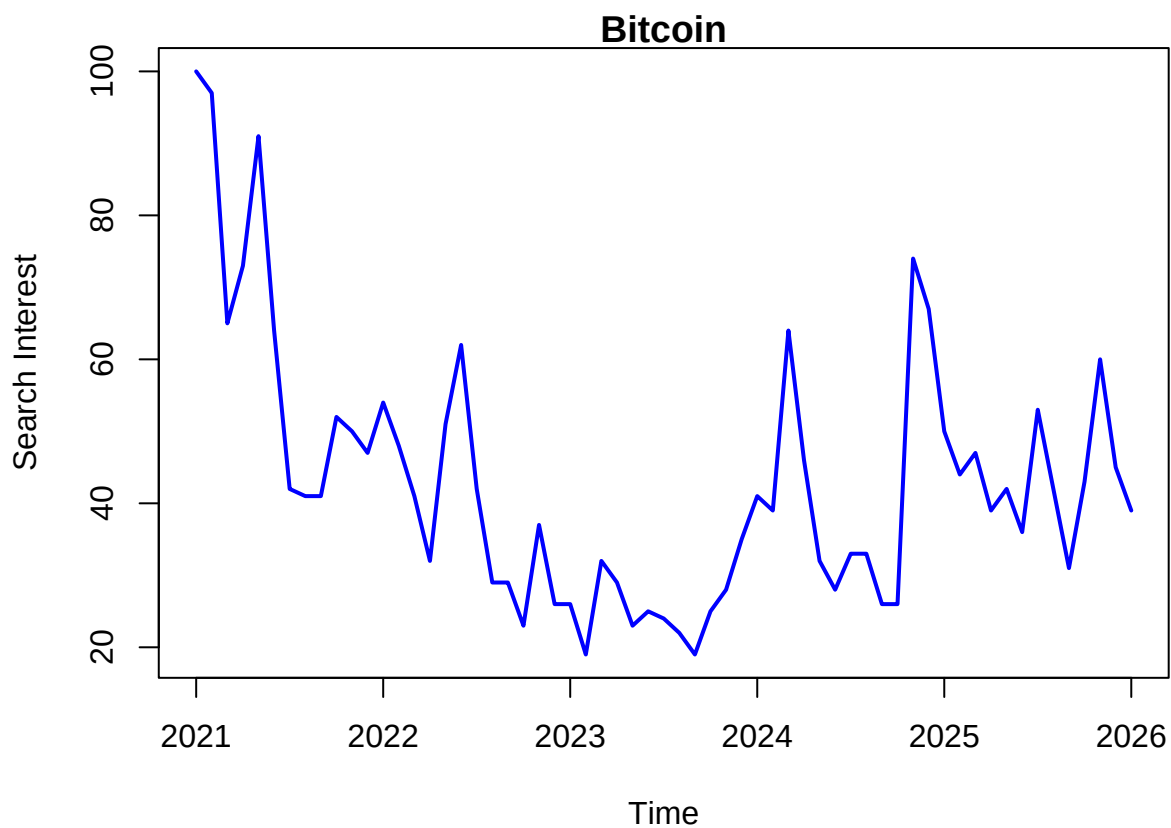

Time Period: 1/1/2021-1/1/2026

```
data <- read.csv("trends.csv")

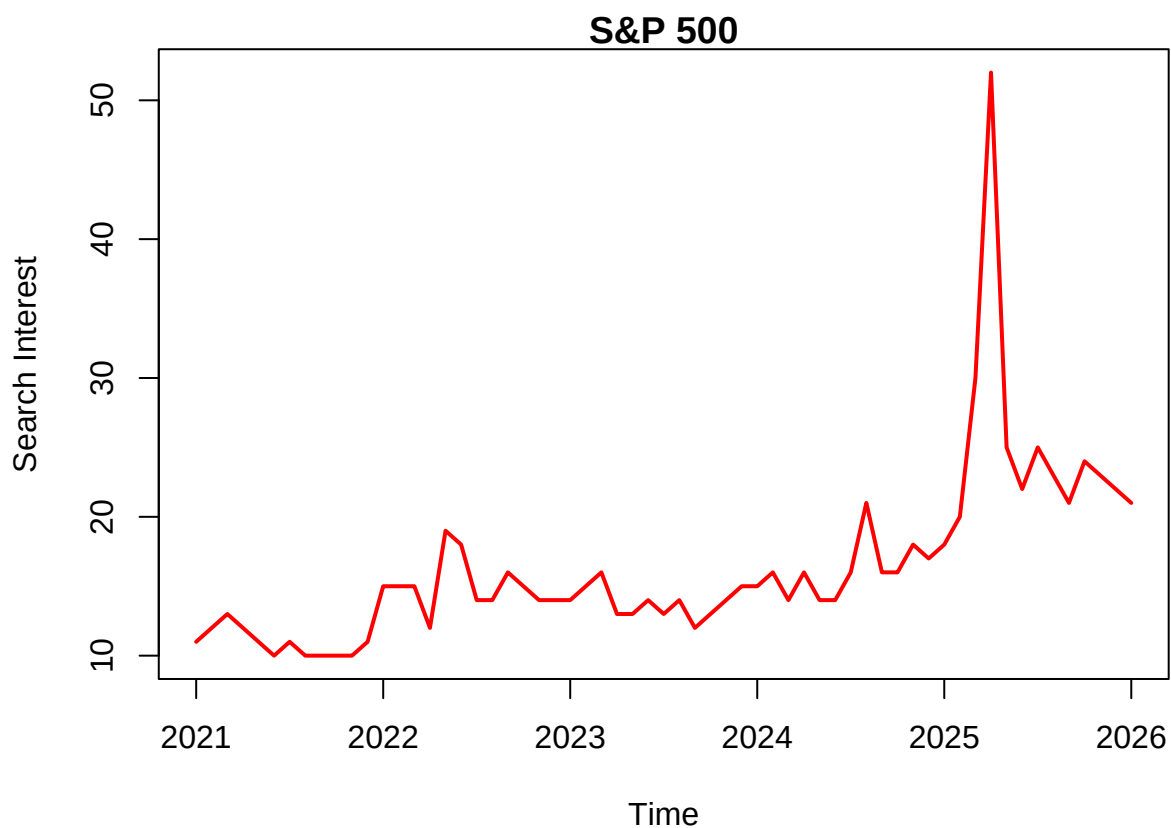

par(mar = c(5.1, 4.1, 1, 2.1))

names(data)[names(data) == "S.P.500"] <- "SP500"
bitcoin_ts <- ts(data$Bitcoin, start = c(2021, 1), frequency = 12)
sp500_ts <- ts(data$SP500, start = c(2021, 1), frequency = 12)
taco_ts <- ts(data$Taco, start = c(2021, 1), frequency = 12)

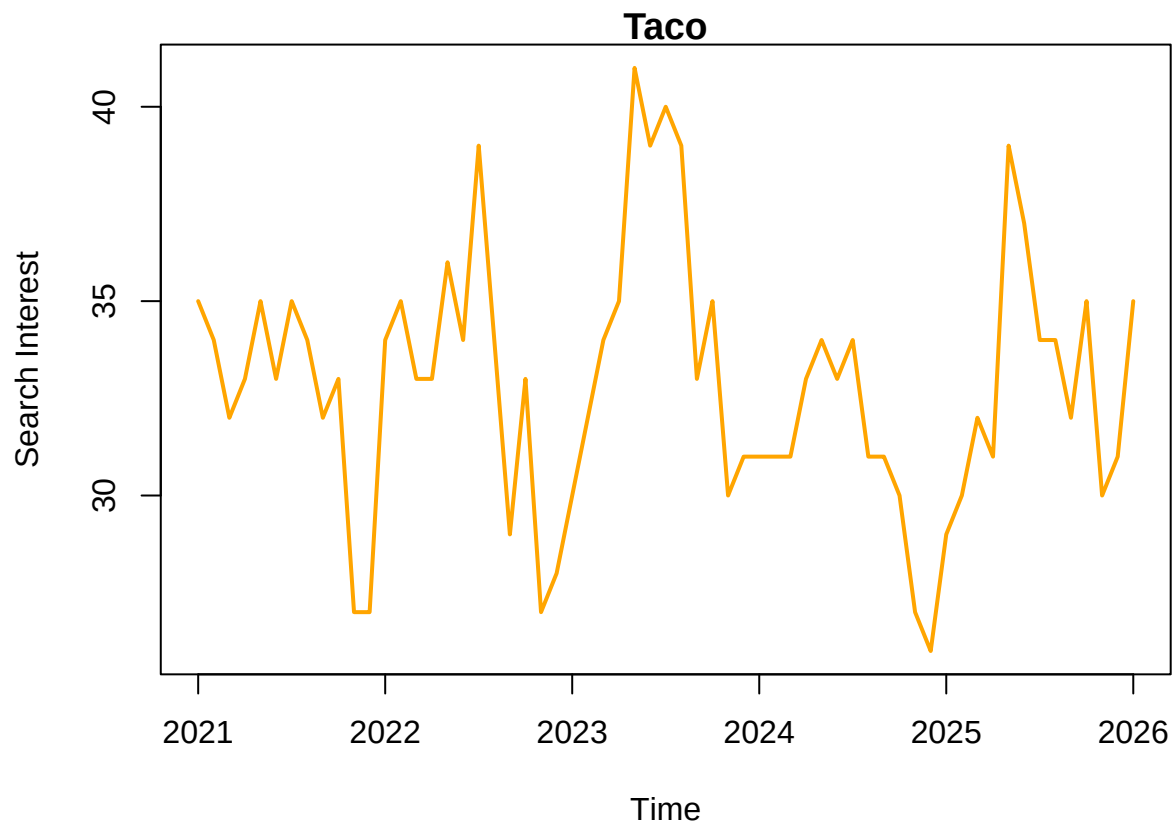

plot.ts(bitcoin_ts, main = "Bitcoin", col = "blue", ylab="Search Interest", lwd = 2)
```

```
plot.ts(sp500_ts, main = "S&P 500", col = "red", ylab="Search Interest", lwd = 2)
```

```
plot.ts(taco_ts, main = "Taco", col = "orange",ylab="Search Interest", lwd = 2)
```

```
ts.plot(bitcoin_ts, sp500_ts, taco_ts,
        col = c("blue", "red", "orange"),
        lwd = 2,
        main = "Combined Time Series",
        ylab = "Search Interest")
legend("topright",
       legend = c("Bitcoin", "S&P 500", "Taco"),
       col = c("blue", "red", "orange"),
       lty = 1, lwd = 2, cex = 0.75)
```
